

Satin / Polished Nickel Finishes

Satin and Polished Nickel are durable and long-lasting plated finishes that require a relatively low level of care when compared to other finishes. In order to retain finish and shine, we recommend regular cleaning with mild detergent, water and non-abrasive cloth for general hygiene and preservation of the finish. Wiping gently in circular motions, and drying with a clean, soft cloth.

UNDER NO CIRCUMSTANCES SHOULD YOU USE HARSH DETERGENTS, ABRASIVES CLOTHS, PAINT THINNERS OR COMPOUNDS FOR CLEANING THESE FINISHES. AS THEY WILL CAUSE SCRATCHING, DISCOLORATION AND HAZING OF THE NICKEL FINISHES.

A high quality, non-abrasive chrome polish may be used for more thorough cleaning.
