

SHUTTLE

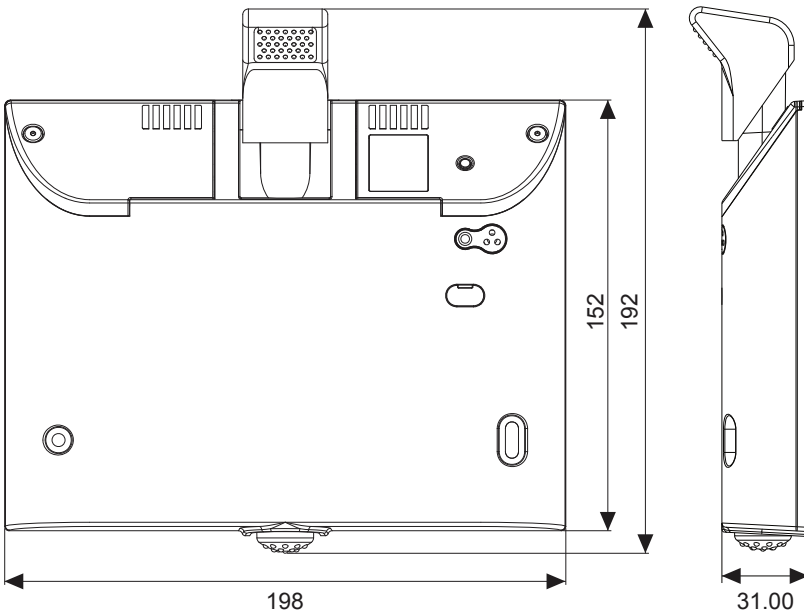

ACOUSTIC FIRE DOOR RETAINER/RELEASE

We have partnered with up-and-coming technology company Sonicco to bring the Shuttle to our range.

The Shuttle is a sophisticated, wire free, intelligent learning electronic device which legally holds open a fire door until the fire alarm sounds.

Requires 2 x C/LR14 alkaline or lithium type batteries which will give up to 4 years life cycle (batteries not included).

 Finished in Black

Product Benefits:

Shuttle has the most advanced listening technology on the market. The unit listens and learns the sound of your fire alarm, this insures that Shuttle will ONLY close to the fire alarm sound and will not react to other sounds such as vacuums, TVs, music and shouting.

Product Features:

- Recognises the sound of the fire alarm in 30 seconds
- Up to 48 months battery life guaranteed and up to 24 months in an extremely noisy environments
- Performance tested to BS EN1155 and accepted by the UK Fire Brigade
- CE marked
- Fire tested (FD30 and FD60 performance)
- Modern slimline design
- Retrofit to the existing acoustic fire door retainers on the market
- Supplied with easy to follow fitment instructions and a drilling template
- Carries a 5-year mechanical guarantee
- Fault indicator
- LCD screen for easy set up
- USB port to support simple unit upgrades
- Night time release facility
